

INDEX

- Albertson, F. W., articles, 27-44, 267-281
- Andes Mountains, ecology of vicuña, 153-219
- Andrews, J. D., article, 1-26
- Anopheles quadrimaculatus*, reactions to moisture, temperature and light, 303-324
- Aspen, clone studies on spoil banks, 241-242
- Associations, descriptions of, grama grassland, 125 greasewood-seepweed, 123 pinyon-juniper, 127 ponderosa pine, 130 *Pseudotsuga/Calamagrostis*, 254 saltbush-grama, 124
- Bird distribution, upland forests, southern Wisc., 351-384
- Bond, R. R., article, 351-349
- Bray, J. Roger, article, 325-349
- Brennan, J. M., article, 45-54
- British Columbia, southern, climate, 249 Douglas fir zone, 247-266 geology and physiography, 248 soils, 250
- Climate, Mesabi Range, Minn., 224 prairie, western Kans., 268 San Augustin Plains, N. Mex., 117 southern British Columbia, 249
- Clone studies of aspen, on spoil banks, 241-242
- Collins, C. L., article, 303-324
- Community metabolism, Silver Springs, Florida, 87-104 temperate cold spring, 283-302
- Curtis, J. T., article, 325-349
- Dermocystidium marinum*, cause of oyster mortality, Chesapeake Bay, 1-26
- Disease, in oysters, caused by fungus, Chesapeake Bay, 1-26
- Douglas fir, stands, N. Mex., 133 zone, B. C., 247-266
- Drought, variations in intensity, 30-31 variations of forage years, 31-32
- Drought cycles, ecology of, 27-44 and grazing intensity, 27-44 on grasslands of Central Great Plains, 27-44
- Drought, grasslands, studies of 1955 and 1956, 32-40
- Drummond, R. O., article, 137-152
- Ectoparasites, of small mammals, Sierra Nevada, relations to environment, 45-54
- Efficiency of production, Silver Springs, Florida, 106-109 temperate cold spring, Concord, Mass., 298
- Energy flow, Silver Springs, Florida, 104-109 temperate cold spring, Concord, Mass., 283-302
- Feeding habits, of vicuña, Andes, 174-176
- Fertilizer experiments, on spoil banks, 239-240
- Forests, bird distribution in upland, southern Wisc., 351-384
- Forage yields, of dry and wet years, 31-32
- Fungus, disease in oysters, 1-26
- Grama grassland association, 125 Grasslands, and drought cycles, 27-44 of Central Great Plains, 27-44
- Grazing, effects of, on prairie, composition and cover, 274 forage production, 276 root development, 277 yield pattern, 276
- Grazing intensity and drought cycles, ecology of, 27-44
- Greasewood-seepweed association, 123
- Hewatt, W. G., article, 1-26
- Index of similarity, 328
- Jameson, E. W., Jr., article, 45-54
- Koford, C. B., article, 153-219
- Leisman, Gilbert A., article, 221-245
- Light, reactions of *Anopheles*, 303-324
- McLean, A., article, 247-266
- Mesabi spoil banks, vegetation and soil, 221-245
- Mesabi range, Minn., climate, 224 geological history, 222 mining operations, 223 spoil banks, 221-245
- Mites, populations in nests of *Peromyscus*, 137-152
- Moisture, reactions of *Anopheles*, 303-324
- Mosquitoes, reactions to moisture, temperature and light, 303-324
- Odum, H. T., article, 55-112
- Ordination, the method, 329 application of, 331
- Ordination, upland forest, southern Wisc., 325-349 biologic validity of, 340 further use of, 346 mechanical validity of, 338 nature of gradients, 342
- Oyster, mortality, Chesapeake Bay, 1-26
- Peromyscus leucopus*, mite populations in nests of, 137-152
- Platt, R. B., article, 303-324
- Phytosociological study, of San Augustin Plains, N. Mex., 113-136
- Pinyon-juniper association, 127
- Ponderosa pine association, 130
- Population composition and density of vicuña, Andes, 156-166
- Population fluctuations, of mites in nests of *Peromyscus*, 137-152
- Potter, Loren D., article, 113-136
- Prairie, in western Kansas, variations in composition, 274 in cover, 274 in production, 276 in roots, 277
- Prairie, response to wet and dry periods, 27-30
- Pseudotsuga* zone, British Columbia, biotic factors, 261 concepts, 253 ecological and geographical relationships, 263 *Pinus/Calamagrostis* associates, 256 *Populus/Calamagrostis* associates, 257 *Pseudotsuga/Calamagrostis* association, 254-255 relation to other zones, 263

- Reactions, of *Anopheles* to moisture, temperature and light, 303-324
- Reigel, Andrew, article, 27-44
- Roots, prairie grasses, western Kansas, 271
- Saltbush-grama association, 124
- San Augustin Plains, N. Mex., climate, 117
general characteristics, 113
phytosociology of, 113-136
soils, 118
vegetational type map, 119-120
- Sierra Nevada, environmental relations of small mammal ectoparasites, 45-54
- Social behavior, of vicuña, Andes, 177-190
- Soils, San Augustin Plains, N. Mex., 118
southern British Columbia, 250
- Spoil banks, Mesabi Range, Minn., 221-245
clone studies, 241-242
fertilizer experiments, 239-240
vegetation and soil chronosequence, 221-245
- Springs, community metabolism, Concord, Mass., 283-302
trophic structure and productivity, Florida, 87-104
- Succession, and fire, 225
on spoil banks, Minn., 223-225
- Teal, J. M., article, 283-302
- Temperature, reactions of *Anopheles*, 303-324
- Territoriality, in vicuña, Andes, 190-205
- Tisdale, E. W., article, 247-266
- Tomanek, G. W., articles, 27-44, 267-281
- Trophic structure and productivity, Silver Springs, Florida, 55-112
temperate cold spring, Concord, Mass., 283-302
- Vegetational analysis, methods, 119-122, 226-227
- Vegetation, and soil development, 226-238
of Mesabi spoil banks, 221-245
on two prairies, 267-281
- Vicugna vicugna*, ecology in Andean puna, 153-219
- Wisconsin, ordination of upland forest, 325-349
- Witherspoon, J. P., article, 303-324
